HARIGARAN A

Senior IT Infrastructure System Administrator (Azure & Microsoft 365) | Windows Server & Cloud Lead

Chennai, Tamil Nadu, India | +91 8220527837 | harigaran.a@outlook.com | linkedin.com/in/harigaran-a818569151

PROFESSIONAL SUMMARY

Senior Server Administrator and IT Infrastructure Lead with 12+ years managing large-scale hybrid Windows environments, including 1,000-2,000+ physical and virtual servers and teams of up to 32 engineers. Deep expertise in Microsoft Azure infrastructure administration (Azure VMs, SQL Server, VPN connectivity, Azure Backup, Entra ID, policy/compliance automation), Microsoft 365 administration (Exchange Online, Teams, SharePoint, OneDrive), Microsoft Intune MDM administration, advanced Windows Server (2008-2022) and Active
Directory architecture, endpoint and email security, and enterprise networking (MPLS/WAN/VLAN, SonicWall and FortiGate VPN). Hands-on AWS experience with EC2, VPC, S3, and IAM. Azure AZ-900, SC-900 and AZ-104 certified, with working knowledge of ITIL service management. Strong troubleshooting and infrastructure support background; proven track record leading technical teams, managing SLA-driven 24x7 operations, and coordinating with cross-regional stakeholders.

CORE SKILLS

• Microsoft Azure Infrastructure: Azure VMs, SQL Server, Virtual Networks, NSGs, Storage Accounts, Azure Backup and Site Recovery, Windows Active Directory hosted on Azure, Azure AD, Azure Policy/Blueprints, Cost Management, on-premises-to-Azure migration; AZ-900, SC-900, AZ-104 certified
• Microsoft 365 Administration: Exchange Online (including Exchange Server to Office 365 migration), Microsoft Teams, Entra ID (Azure AD), SharePoint, OneDrive; exposure to IP-PBX systems and business telephony/voice connectivity concepts
• Windows Server Administration: Windows Server 2008-2022, Active Directory (ADDS) architecture, Group Policy (GPO) design, DNS, DHCP, WSUS, Windows Server Failover Clustering (WSFC), IIS administration and SSL certificate management, print server management, remote troubleshooting via iDRAC and RDP, Intel-based server hardware support
• Endpoint & Device Management: MDM administration (Microsoft Intune, AirWatch, BlackBerry), DLP, endpoint encryption and AV solutions across 5,000+ endpoints, desktop/laptop troubleshooting and lifecycle management
• Security Solutions: Microsoft Defender for Office 365, Symantec Email Gateway, McAfee endpoint security (AV, DLP, encryption), Fortinet FortiNAC (NAC implementation and project support), CrowdStrike Falcon (limited exposure)
• Database: SQL Server installation and configuration, database and table creation, backups, and troubleshooting
• Networking & VPN: VPN connectivity (SonicWall and FortiGate firewalls), Cisco switches (basic configuration, VLANs), MPLS, WAN, VLAN, TCP/IP, LAN/Wi-Fi troubleshooting, point-to-point and multipoint links, PRTG monitoring; supported 100+ site locations
• Virtualization: VMware vCenter (cluster servers, snapshots, cloning, vMotion, P2V migration), Microsoft Hyper-V (VM builds, templates, patching, performance tuning)
• AWS Cloud: EC2 instance management, VPC networking and subnet design, S3 storage, IAM access control, security groups; working knowledge of web server hosting and load balancing concepts
• Automation & Scripting: Script-based automation of manual operational and access-management tasks to improve efficiency; AWS/DevOps administrator training in progress
• ITSM & Service Management: ITIL Foundation-aligned patch and change management, SLA management (P1/P2/P3), IQS and Salesforce ticketing platforms, asset management, audit and compliance (ISMS)
• Operations & Leadership: 24x7 shift and off-hours/weekend support, team shift roster planning, client meetings and issue management, incident reduction planning, environment standardization (OS drives, CPU, memory) through the full change process

PROFESSIONAL EXPERIENCE

Senior Operations Technical Specialist — Fujitsu Consulting India Pvt. Ltd. **Jun 2023 - Present**

• Administer and maintain 1,000+ hybrid Windows Servers and Azure cloud instances, ensuring 99%+ availability across production environments
• Lead a technical team of 5 engineers, driving patch management, change management, server operations, and daily team coordination calls.
• Administer Azure infrastructure including Virtual Machines, SQL Server, Virtual Networks, NSGs, Storage Accounts, Recovery Services Vaults, Azure Backup, and Site Recovery services for production workloads.
• Manage Windows Active Directory hosted on Azure and hybrid identity environments using Microsoft Entra ID and Azure AD Connect, including user lifecycle management, Conditional Access policies, application registrations, and access governance.
• Administer Microsoft 365 services including Exchange Online, Microsoft Teams, Entra ID, SharePoint, and OneDrive.
• Manage endpoint devices using Microsoft Intune (MDM) for enrollment, compliance, and policy enforcement; support endpoint configuration and device-management troubleshooting.
• Support email and endpoint security using Microsoft Defender for Office 365 and endpoint protection tools, with limited exposure to CrowdStrike Falcon.
• Configure and troubleshoot VPN connectivity using SonicWall and FortiGate firewalls.
• Perform SQL Server installation, configuration, database and table creation, backups, and troubleshooting.
• Implement role-based access control (RBAC), security best practices, and compliance standards across Azure subscriptions while supporting audit and governance requirements.
• Architect Azure cloud infrastructure, including Azure Policy/Blueprints for compliance, Cost Management and tagging for resource tracking, and migration of on-premises workloads to Azure
• Manage Active Directory infrastructure including Domain Controller promotion/demotion, AD replication, FSMO role management, Group Policy, DNS, DHCP, WSUS, domain controller health checks, authentication troubleshooting, encryption key lifecycle management, and Windows Server Failover Clustering (WSFC) for high availability and incident resolution.
• Lead Windows Server migration projects, including in-place and side-by-side migrations from legacy Windows Server versions to Windows Server 2019/2022, Active Directory migration, GPO migration, server consolidation, and post-migration validation.
• Support AWS cloud operations, including:

- EC2: provisioning, configuration, and lifecycle management of Windows/Linux instances
- VPC: custom VPC design, public/private subnetting, route tables, Internet and NAT gateways, security groups, and VPC peering
- S3: bucket configuration and storage management for application and backup data
- IAM: user, role, and policy-based access control
- Web server hosting and load balancing concepts for two-tier application deployments

• Manage VMware vSphere/vCenter and Hyper-V environments, including snapshots, cloning, vMotion, P2V migrations, cluster administration, VM provisioning, template management, patching, capacity planning, and performance tuning.
• Oversee backup processes and manage testing environment lifecycle: creation, modification, and decommissioning
• Automate manual operational tasks using scripts to improve efficiency and strengthen security and access management
• Operate IQS and Salesforce-based ITSM tools for incident logging, tracking, and SLA compliance
• Provide 24x7 shift-based support, including off-hours and weekend coverage as required; prepare the team shift roster and guide the team during technical issues
• Join client meetings to address issues, review service improvements, and collaborate with vendors and service providers when required
• Plan incident reduction initiatives and standardize the client environment (OS drives, memory, CPU) by creating a micro plan and implementing it through the complete change process
• Administer IIS web servers and SSL certificate lifecycle (request, renewal, binding); manage print server roles and printer issues
• Troubleshoot Wintel servers remotely using iDRAC and RDP; coordinate hardware and software installations and upgrades
• Maintain asset records and support audit and compliance requirements
• Coordinate with Japan-based teams on process alignment, cross-regional escalations, and daily bilingual review calls

Wintel Administrator — IDC Technologies Sol (I) Pvt. Ltd. — Client: TCS **Jan 2022 - May 2023**

• Administered and supported large-scale Windows Server 2008 R2, 2012, 2016, and 2019 environments across enterprise datacentres, managing 2,000+ physical and virtual servers and handling P1, P2, and P3 incidents within SLA.
• Managed VMware vSphere/vCenter infrastructure, including VM provisioning, snapshots, cloning, vMotion, storage management, and resource optimization.
• Administered SQL Server instances, including installation, configuration, backups, and connectivity/performance troubleshooting.
• Supported VPN connectivity and firewall-related access requests (SonicWall and FortiGate) for application and remote-access needs.
• Performed server build, decommissioning, and lifecycle management activities for physical and virtual servers hosted in IDC environments.
• Monitored server health, performance, capacity, and availability, ensuring adherence to SLA and operational standards.
• Executed datacentre activities including hardware coordination, rack and stack support, server maintenance, and infrastructure upgrades.
• Managed Active Directory, DNS, DHCP, and Group Policy across production environments; supported Windows client/server administration and authentication troubleshooting.
• Supported disaster recovery (DR) testing, backup validation, and business continuity initiatives for critical business applications.
• Worked closely with storage, network, and application teams during maintenance windows, migrations, and major incidents.
• Conducted VMware VM migrations, capacity planning, and infrastructure optimization to improve datacentre performance and stability.
• Provided L2/L3 support for critical incidents and participated in root cause analysis (RCA) for recurring infrastructure issues.
• Provided 24x7 shift-based support, including off-hours and weekend coverage for P1 incidents and planned changes
• Troubleshot Windows servers remotely using iDRAC and RDP
• Administered IIS and SSL certificates, and managed print server roles and related printer issues
• Joined client meetings to address issues, supported incident reduction plans, and supported audit and asset management requirements
• Led OS migration project from Windows Server 2008 R2 to 2019 across the production environment
• Executed patch management and change management across the server estate using ITSM tooling

Server Administrator & Team Lead — Precision Informatics (M) Pvt. Ltd. — Client: TVS Credit Services **Aug 2017 - Dec 2021**

• Server & Infrastructure
  - Installed, configured, and maintained 80+ Windows Server 2019 production, UAT, and DR systems
  - Completed a full server migration project from Windows Server 2008 R2 to 2019
  - Managed Active Directory, Group Policy, DNS, and DHCP for the enterprise domain and client systems
  - Administered Microsoft 365 services (Exchange Online, Teams, Entra ID/Azure AD, SharePoint, OneDrive) following the move to Office 365
  - Administered McAfee AV/endpoint security, DLP, and endpoint encryption
  - Managed email security using Microsoft Defender for Office 365 and Symantec Email Gateway, including email protection and security administration
  - Performed SQL Server installation and configuration, database and table creation, backups, and troubleshooting
  - Administered IIS web servers and SSL certificates, and managed print servers for enterprise users
  - Troubleshot servers and hardware remotely using iDRAC and RDP
  - Coordinated ISMS audits PAN India; developed and maintained information security policies
  - Provided first-level administration for AWS and Azure environments
  - Managed 12 BDC servers across hub locations
• Key Projects
  - Deployed DLP, encryption, AV, and Secure Internet Gateway solutions for 2,500+ endpoints
  - Supported a Network Access Control (NAC) project using Fortinet FortiNAC, covering implementation and project support
  - Implemented ADDS, DNS, DHCP, WSUS, and application servers for HRCS and HIB subsidiary companies
  - Migrated company email infrastructure from Exchange Server to Office 365
  - Implemented a social distancing app for employee safety compliance

• Network
  o Administered MPLS and WAN connectivity for 100+ locations, including hubs, area offices, and branch offices
  o Configured and managed VPN connectivity using SonicWall and FortiGate firewalls
  o Configured Cisco switches, including basic switch configuration and VLANs
  o Designed and deployed network solutions, including routing, switching, data center, and DR networking
  o Managed the PRTG monitoring tool
  o Implemented a video conference solution across all hub offices; exposure to IP-PBX systems for business telephony
• Infrastructure Management
  o Managed IT infrastructure for 5,000+ laptop and desktop assets, end-to-end from procurement to scrap, with asset records maintained for audit and compliance
  o Maintained enterprise MDM installations (AirWatch and Microsoft Intune), supporting device management and troubleshooting across endpoint incidents of varying severity
  o Led a technical team of 32 engineers across server, network, and helpdesk operations, preparing shift rosters and providing off-hours and weekend support as required
  o Joined client and stakeholder meetings to address issues; planned incident reduction and standardized server environments through the change process
  o Delivered physical security enhancements (CCTV with NVR, biometric access) for 100+ branch offices
  o Implemented a centralized call center solution for the TVS Credit HR subsidiary (HRCS)

System Engineer — Ensure Support & Service Pvt. Ltd. — Client: Mando Automotive India **Mar 2017 - Oct 2017**

• Provided desktop, server, and network support; managed software installations and licensing
• Configured Outlook email clients, IP printers, and peripheral equipment
• Developed the entire IT infrastructure at Mando Plant 1 & Plant 2
• Implemented Active Directory on Windows Server 2012 R2
• Coordinated AMC vendors for UPS, EPBX, VC, signage displays, Wi-Fi, and IP phones

System Engineer — Donghoow Surfacetech India Pvt. Ltd. **Aug 2014 - Jul 2016**

• Managed client and management IT requirements; coordinated with IT vendors
• Handled escalations, user support calls, and daily IT activity reporting

EDUCATION & CERTIFICATIONS

• Bachelor of Computer Applications (BCA) — Alagappa University, Distance Education | 2021-2024
• Diploma in Computer Engineering — Kumaran Polytechnic College, Tiruvannamalai | 2011-2014
• Microsoft Azure AZ-104 (Administrator Associate) — Certified
• Microsoft Azure AZ-900 (Fundamentals) — Certified
• Microsoft Azure SC-900 (Security, Compliance & Identity Fundamentals) — Certified
• ITIL Foundation — Simplilearn
• MCSE — Udemy
• AWS Administrator — Self-study/Udemy
• AWS and DevOps Administrator Training — In progress

AWARDS & RECOGNITION

• IT Best Performer Award — TVS Credit Services Ltd.
• Best Team Award — Precision Informatics (99.5% TAT achievement)
• Best Performer Award 5 Times – Fujitsu
